WHOLESALE TRADE LIST

SEASON 1927-28

H. R. PARKER NURSEYMAN

Mailing Address:
Route No. 1, Box 1034,
San Gabriel, Calif.

Member American Association of Nurserymen

Member Pacific Coast Association of Nurserymen

LOCATION

We are located in the Famous San Gabriel Valley, where soil and climatic conditions are as good as could be found for the growing of fine nursery stock of almost any kind.

Just 30 minutes from the center of Los Angeles. All shipments take Los Angeles rate, have all the cross continent railroads, and the greatest network of Electrical lines in the world to offer as shipping facilities.

Wholesale Trade List

Season 1927-28

MOVEMENT OF STOCK:

Field Grown stock begins to move about December 1st, depending somewhat upon the season. Stock grown in containers, we ship every day in the year except Sundays and holidays.

SHIPMENT:

Please state how you wish shipment to be made, whether by freight, express or parcel post. When not instructed in this respect we use our best judgment and assume no responsibility in so doing. All goods travel at purchaser's risk and expense after being delivered to carriers in good order.

CLAIMS:

We want to make good any legitimate claim that may be presented. Check your shipment and report any shortage or other error within ten days, otherwise it will not be recognized.

WARRANTY:

Should any stock that I sell prove untrue to label, I will upon proper proof, replace same free of charge or return the purchase price, beyond which I assume no responsibility. When stock is sold and delivered to the customer, it passes out of our care, therefore we can not be responsible for the growth or germination of any seeds, bulbs, plants or trees that we send out. Every order is accepted upon these conditions.

PACKING CHARGES: Study well before placing order.

Bare root stock will be packed free where cash accompanies order, otherwise a small charge will be made to cover cost of material used. Stock established in one gallon containers are shipped only in multiples of tens, as the crates are all made up to hold this number. Add 75c per crate for cost of material. All crates are made of new lumber and can be used again. Five gallon containers are shipped in multiples of two, as the crates are made up for this number only. Add 50c for each crate of this size. Our crates are made up so as to secure the lowest possible freight rate on this class of stock, and while the crating may seem a little high, you save a great deal on transportation charges. No free packing on established stock except in small potted plants which will be packed free at all times.

RATES:

Bare root stock will be furnished in multiples of tens only. 40 of any given variety and grade will be furnished at the hundred rate. 250 of any given variety and grade will be furnished at the thousand rate. Established stock must be ordered in multiples of 10 in one gallon size and two in five gallon size, but may be assorted to suit purchaser.

TERMS: Read very carefully before placing order.

Cash must accompany order or shipment will be sent C. O. D. if at all, except to those known to me to be responsible. Those wishing to open a short time charge account will please send satisfactory bank and trade references, allowing time for investigation.

All bills are due and payable on the first day of the month unless otherwise arranged before placing order, and every order is accepted with the distinct understanding that these terms will apply. Eight per cent annual interest charged after 60 days.

Stock established in Five-Gallon Cans and Ten Gallon Tubs.

TREES, EVERGREEN

Price, Each

ACCACIA MELANOXYLON—Black Acacia

5 gal. cans, 7 to 8 ft.....\$1.00

CASURINA STRICTA—Beef wood or she oak

Box 192
Lamanda Park
Pasadena, Calif.~~

NEW ADDRESS:
1214 DUARTE ROAD,
SAN GABRIEL, CALIF.

Dear Sir:

Continuing an arrangement of several years standing this office is cooperating with the Department Library in the upbuilding of the Department's collection of catalogs and other trade publications of firms and individuals engaged in the nursery and seed industries. This collection, which now numbers approximately 37,000 items, is probably the largest of its kind in the world and forms a permanent part of the Department Library. It is invaluable in investigations concerning the history, nomenclature, characteristics, and distribution of varieties. Lists of the current year are also in daily use in answering inquiries as to sources from which plant material may be obtained and as to varieties being introduced to the trade. The collection as a whole is open to the general public for reference use, and the information in it is made more readily available by means of indexes.

In order that this collection may be well-rounded and thoroughly serviceable we are desirous of obtaining all available catalogs and lists of fruits, vegetables, and ornamentals. We will, therefore, be very glad to receive any catalogs or other printed matter you may have for distribution in the current year. We will also greatly appreciate the favor if you will place the address "Horticulture, Bureau of Plant Industry, U. S. Department of Agriculture, Washington, D. C." upon your permanent mailing list.

We enclose a gummed address label for your convenience in sending your publications.

Very truly yours,

L. C. Corbett
Senior Horticulturist in Charge
